China International Supply Chain Expo (CISCE)

On May 18, 2022, in a speech via video link at the Conference on the 70th Anniversary of the Council for the Promotion of International Trade (CCPIT) & Global Trade and Investment Promotion Summit, Chinese President Xi Jinping emphasized the necessity of ensuring the security and stability of global industrial and supply chains and making the “pie” of cooperation bigger to allow development gains to better trickle down to the people of all countries. As a move to implement Xi’s instructions, the CCPIT hosted the first China International Supply Chain Expo (CISCE) in Beijing from November 28 to December 2, 2023.

The CISCE is an international platform that fosters communication and deepens cooperation and co-development among enterprises and institutions. With the theme “Connecting the World for a Shared Future”, the CISCE has achieved its goal of connecting the upstream, midstream, and downstream sectors, bringing together large, medium and small enterprises, coordinating industry, academia, research and practical application, and fostering interaction between Chinese and international businesses with great success. It not only realized its original intention of advancing international industrial and supply chain cooperation but also established itself as a high-standard, high-quality, and high-level global economic and trade event. It has become a bridge and platform that promotes industrial integration, drives innovation, and fosters market connectivity. Additionally, it has contributed to the formation of closer global partnerships in supply chains, aiding global economic recovery and promoting shared prosperity.

China International Supply Chain Expo (CISCE)

Held from November 26th to 30th, 2024, the second CISCE achieved remarkable success. A total of 620 enterprises from 69 countries and regions participated in the event, bringing along more than 400 upstream and downstream partners. During the Expo, 69 themed activities and over 370 matchmaking sessions were held, attracting 200,000 on-site visitors from 100 countries and regions. More than 210 cooperation agreements were signed, amounting to a total value of USD 22 billion. At the Expo, the CCPIT released the Global Supply Chain Promotion Report 2024, which, for the first time, introduced the Global Supply Chain Promotion Index and Connectivity Index, providing valuable insights for analyzing global supply chain trends.

The third CISCE will be held from July 16th to 20th, 2025, at the China International Exhibition Center (Shunyi Venue) in Beijing. It will feature six key industrial chains: Advanced Manufacturing Chain, Clean Energy Chain, Smart Vehicle Chain, Digital Technology Chain, Healthy Life Chain, Green Agriculture Chain, along with a Supply Chain Service Exhibition Area.

China International Supply Chain Expo (CISCE)

6 Chains

Advanced Manufacturing

Showcase the entire industrial chain in the global advanced manufacturing sector, ranging from front-end R&D, application of new materials, key components and processing, to intelligent manufacturing and high-end equipment.

Clean Energy

Showcase the full-cycle industrial chain of clean energy from supply to consumption based on the "energy-grid-load-storage" concept, focusing on PV power, wind power, energy storage, hydrogen energy, smart grids, the low-carbon transformation of traditional energy.

Smart Vehicle

Showcase key technologies and products across the smart vehicle industry, including raw materials, key components, battery-motor-electronic control systems, intelligent networking technology, EVs, and charging and battery recycling services.

Digital Technology

Showcase cutting-edge digital technologies, emerging industries, and technological solutions and applications, connecting innovation, industry and application with technological transformation, industrial incubation and application scenarios.

Healthy Life

Showcase key products and technologies in the field of big health, integrating traditional medicine, healthy living, consumer lifestyle, and other distinctive industries to build a full lifecycle health industry chain from birth to elderly care.

Green Agriculture

Showcase the complete agricultural industry chain from the "farm" to the "table", including upstream agricultural production, midstream processing, and downstream distribution, with a focus on agricultural informatization and intelligence.

1 Exhibition Area

Supply Chain Service

Showcase supply chain innovation and comprehensive service, including logistics services and technology, new trade patterns, supply chain optimization, finance and insurance, IP rights, consulting and legal services, etc.

Editor's Note

Since 1995, the China Council for the Promotion of International Trade (CCPIT) has compiled and printed the Chinese-English bilingual annual report of Fairs and Exhibitions in China (hereinafter referred to as "the book") every year, and published information about major economic and trade exhibitions to be held in China that year. The book has been welcomed by embassies and consulates in China, trade associations as well as enterprises as it provides important reference for them to participate in and visit these fairs and exhibitions.

Fairs and Exhibitions in China (2025) (hereinafter referred to as "the book 2025") is coordinated by CCPIT Department of Exhibition Management (Office of International Exhibitions Bureau and World Expo Affairs). Academy of CCPIT is responsible for its compilation.

To better understand and use the book, please follow the details below:

I . Scope of Data

The terms of fairs, exhibitions and expos in the book 2025 are limited to economic and trade ones, excluding public performances and events related to culture, recruitment, local small fairs and others.

Fairs and Exhibitions in China (2025) compiles information on nearly 1,500 key and high-profile economic and trade exhibitions scheduled to take place in over 80 cities across China's 34 provincial-level administrative regions in 2025, including 23 provinces, 5 autonomous regions, 4 municipalities, and 2 special administrative regions. Project data include name, time, venue, host & organizer, display content and contact information of these fairs and exhibitions. Readers can search for information by the host city or the industry.

II . Source of Data

The data in this book mainly come from CCPIT local sub-councils and industrial sub-councils, exhibition hosts and organizers, exhibition centers and online/printed official media.

III . Limitations and Accuracy

Due to various reasons, the uncertainty remains whether the fairs and exhibitions in the book 2025 will proceed as scheduled, and the information of some projects have not yet been clarified when the book is to be published. Although the Editorial Committee has cross-checked the data through various means, there may still be changes and modifications in terms of the date, venue, even the alteration, cancellation or addition of the projects.

Therefore, users are suggested to contact the hosts and organizers to verify the details before participating in or visit the fairs and exhibitions.

IV . Download and Search

The book is available in both printed and electronic versions, and is also open to online searching. Readers can visit the official website of CCPIT (www.ccpit.org) and download it in the "Research Reports" section, or visit the website of exhibition.ccpit.org.
